Re: Torch Lake Superfund Site
(Public Input)

Dear Sirs:

A rescue crew of Michigan State Police and other divers, during the recovery of a body a few years ago, reported seeing a large cache of under-water drums and heavy dark sludge in about 10 to 12 ft. of water located as follows:

Torch Lake area between the Lake Linden swim area, the Park at the foot of MacDonald Street extended and the sand bank.

It is requested that this site be carefully investigated and included in the early June test pit project.

Please give this matter your serious consideration.

Respectfully,

Elmer J. Dupuis
